

VALENTIN CAMUSSO

University Technician in
Web Development

ABOUT ME

I develop web and mobile systems focused on solving real-world problems. I have built management platforms, mobile apps with offline synchronization, GPS tracking systems, process automation, and integrations with APIs such as WhatsApp and Twilio. Focused on delivering functional, scalable, and product-oriented solutions.

SKILLS

PHP	Expo (React Native)
Laravel	Mapbox / Leaflet
Node.js	GPS Tracking
<u>English (C1)</u>	Tailwind CSS
REST APIs	Twilio API
TypeScript	JavaScript
WebSockets	GitHub
API Integration	Vue.js
PostgreSQL / MySQL	React

➤ EDUCATION

UNIVERSIDAD NACIONAL DEL COMAHUE
2022 - 2024

University Technician in Web Development

UNIVERSIDAD NACIONAL DEL COMAHUE
2021 - 2022 (*Incomplete*)
Bachelor's Degree in Computer Science

➤ EXPERIENCE

 **TINEGOCIOS**
TI Negocios FullStack Developer

May 2025 - present

- Development of web and mobile systems for dynamic form management, medical platforms, and machinery monitoring solutions with GPS tracking. Implementation of report generation (PDF/Excel), interactive maps, real-time data synchronization, and evidence handling (images and signatures) using Vue.js, Laravel, and mobile-first technologies.
- Development of an MVP recruitment platform with candidate onboarding, job posting management, applications, and user profiles. Integration of AI features using OpenAI to optimize job descriptions and improve candidate profiles, along with process automation and email-based notifications.

MUNICIPAL SPORTS MANAGEMENT

FullStack Developer

Aug 2024 - Dec 2024

Alongside a teammate, we designed and developed a complete sports management system as the final project of our university degree.

- Implemented key features, such as automatic fixture generation.
